## **Porzio, Bromberg & Newman, P.C. Announces Change of New England Address**

WESTBOROUGH, MA, June 3, 2015 – To better serve the growing needs of life sciences companies and its own expanding customer base, Porzio, Bromberg & Newman, P.C. (Porzio), along with its subsidiary Porzio Life Sciences, LLC (PorzioLS), has moved its New England operations to 200 Friberg Parkway Suite 3003, Westborough, MA 01581.

PorzioLS first established its New England presence in December 2010 under the direction of Michelle D. Axelrod, Esq., Vice President of PorzioLS and Principal of Porzio. According to Ms. Axelrod, "Our expanding operations and the new Westborough location build upon the commitment Porzio has made to Massachusetts and all of New England over the past four years, and reflect the success we have achieved in serving the evolving life sciences industry throughout the Northeast."

PorzioLS is a wholly-owned subsidiary of Porzio, a firm nationally recognized for its litigation and regulatory compliance work for the life sciences industry. Together, the companies provide regulatory compliance and legal and business services related to product development and commercialization, the Prescription Drug Marketing Act, anti-kickback statutes, the Sunshine Act, FDA regulations, false claims act, ex-US industry codes and OIG guidances.

The new location is further evidence of Porzio's commitment to the life sciences industry and another indicator of the company's continuous expansion. PorzioLS announced earlier this year the opening of a Netherlands office, Porzio Life Sciences, B.V., in addition to its increasing suite of global compliance and commercialization products and services.

### **About Porzio Life Sciences, LLC**

Porzio Life Sciences, LLC (Porzio Life Sciences, B.V. in the Netherlands) helps life sciences companies improve the productivity and efficiency of their sales and marketing programs, while maintaining compliance management systems with complex state, federal and global regulations. PorzioLS helps pharmaceutical, medical device and biotechnology organizations master the evolving regulatory environment through an array of innovative products and services designed to master the evolving regulatory environment.
