Porzio, Bromberg & Newman is proud to announce that the firm has achieved ISO/IEC 27001:2022 Certification from the International Organization for Standardization (ISO). This certification validates Porzio's dedication to implementing top-tier security measures and maintaining a cutting-edge information security management system that adapts to the dynamic landscape of information technology and security.

ISO/IEC 27001 is a globally recognized standard for managing information security, focusing on upholding the confidentiality, integrity, and availability of data within an information security management system. To receive an ISO certification, law firms must follow security best practices while continuing to review and improve the firm's security. This certification underscores Porzio's proactive approach to safeguarding client data, ensuring it remains secure, protected, and responsibly managed.

"Porzio's Information Security Management System supports the organization's delivery of legal services to its clients by providing a secure, trusted, scalable, and sustainable computing environment for the firm," said Mark T. Allen, Porzio's Chief Technology Officer. Allen continues, "This certification serves as a testament to the firm's commitment to prioritizing the support, security, and protection of our clients' information. By adhering to and upholding the highest global standards in information security management, we are dedicated to ensuring the utmost integrity and safety of the data entrusted to us."

To secure certification, Porzio diligently underwent a comprehensive series of internal and external reviews, validating that its IT systems and data privacy practices met the stringent requirements of ISO/IEC 27001:2022. This process was audited by MSECB Management Systems, Inc., a globally recognized leader in examination, audit, and certification services.
